## An Experience for Art Lovers

This is an experience for lovers of art. And it will come as no surprise that the most prolific works of artistic endeavours in the world belong to Egyptians. In every museum of the world, you will find art that Egyptians have created over the centuries. It's an impressive accomplishment. And a stroll around Cairo and a cruise along the Nile River is a testament to many things. Most notably the monuments, sculptures and tomb adornments of the first 3 dynastic periods. Their creative genius was embedded in their faith and ritual practices.

But this tour explores much more than the influence of the era of the pharaohs. It takes on a much broader perspective and delves into the expanse of Islamic art whether it be in architectural design and building, to ornate wall and ceiling decorations, to weaves, sculptors and so much more. And from the very breath and intensity of Islamic form, it looks through the ages and to the present. And we then delve into contemporary art forms of modern day artisans.

These artists embrace the challenges and highs of Egyptian life. Egyptian artists are taking their place on the world stage. The world is appreciating the creativeness, the intensity and the brilliance of these new artisans. And they confront the present and the past with moving, emotional and penetrating insight. And this experience will take you to galleries whose focus, amongst other things, has been to nurture the talents of those that are emerging. Of those who are interpreting life and pushing the boundaries much like their ancestors.

This tour focusses on a number of art centres, museums and contemporary art galleries including:

### Lunch - The Revolving Restaurant

We enjoy taking our guess out for lunch because it's another way to experience Egyptian culture. We just want to make the following points. The restaurant that is part of this experience is the revolving restaurant atop the Hilton Hotel. This is one of the top restaurants in Cairo and a chance to not only take in the stunning view of Cairo, but as a great interlude to captivating day.

### Ramses Wissa Wassef Art Center

Near the pyramids at Giza, the centre was founded in the early 1950s by the late architect Ramses Wissa Wassef as a weaving school. It has since evolved to comprise workshops and showrooms, a pottery and sculpture museum, houses and farm buildings, constructed entirely of mud brick.

## A Visionary of Expression

For Wissa Wassef, vaulted and domed mud brick structures represented something quintessentially Egyptian as these forms had been adopted in turn by Paranoiac, Coptic and Islamic civilisations. The choice of this traditional technology also reflected his desire to transmit the values of handicraft to succeeding generations in a rapidly industrialising country.

## A Unique Experiment

The [Ramses Wissa Wassef Art Center](#) was the home of a unique experiment in tapestry weaving that has produced extraordinary works admired and collected by museums and galleries around the world. And is ceramic creations was also a passion that drove him in his life.
